

Elements of the German Braille Code (incorporating the revisions of 1998 - 2011)

Note: Individual signs in the listings are preceded by ⠠.

The Alphabet

The alphabet is identical to the English braille alphabet with the following additions:

⠠⠨⠠	ä Ä
⠠⠨⠠	ö Ö
⠠⠨⠠	ü Ü
⠠⠨⠠	ß

Other accented letters are preceded by ⠠, e.g. Café ⠠⠨⠠⠨⠠⠨⠠⠨⠠⠨⠠.

Punctuation

The following signs are different from those of Standard English braille:

⠠⠨⠠.	period and abbreviation point
⠠⠨⠠.	apostrophe
⠠⠨⠠.	query
⠠⠨⠠⠨	oblique stroke
⠠⠨⠠⠨⠠⠨	dash; hyphen in front of a word (<i>Auslassungsstrich</i>)

The dash (*Gedankenstrich*) is written unspaced from the preceding word but is followed by a space. When used to mean "from ... to" between words (*Streckenstrich*) as in "der Flug Berlin-London" it is unspaced on both sides. A hyphen before a word (*Auslassungsstrich*) indicates that part of a word is repeated, as in "Semsteranfang und -ende".

Many signs are identical in form and use with their Standard English braille counterparts:

⠠⠨⠠⠨	comma
⠠⠨⠠⠨	colon
⠠⠨⠠⠨	semicolon
⠠⠨⠠⠨	exclamation mark
⠠⠨⠠⠨	hyphen (<i>Bindestrich</i> and <i>Trennstrich</i>)
⠠⠨⠠⠨⠠⠨⠠⠨⠠⠨	parentheses
⠠⠨⠠⠨⠠⠨⠠⠨⠠⠨	(double) quotation marks

Miscellaneous signs

⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠	€	⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠⠠⠠	—
⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠	£	⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠⠠⠠	\
⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠	&	⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠⠠⠠	→
⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠		⠠⠠⠠⠠⠠⠠⠠⠠	⠠⠠⠠⠠⠠⠠⠠⠠	←

Capital letters

In most German braille, capitals signs are almost only used in the following situations:

- to indicate the capital letter of the "polite" pronouns: Sie, Ihnen, Ihr
- in abbreviations and acronyms (but not personal initials or abbreviations indicated with an abbreviation point), e.g. BRD, PC, MWSt (but not: J.S. Bach, Schweiz. Rotes Kreuz, bzw., usw.)
- when there is a capital letter at a position other than the first of a word, e.g. McDonald

In school texts it may be as well to mark all capitals with the appropriate signs.

- Single capital letters followed by lowercase letters are preceded by the sign: ⠠⠠
- More than one capital letter or single capital letters not followed by lowercase letters are preceded by the sign: ⠠

Examples: Ihnen ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠, MWSt ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠, GmbH ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠, Karl I ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠, 30 MHz ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠ (here the sign ⠠ may also "replace" the space), McDonald ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠, W.A. Mozart ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠.

There is a sign for lowercase letters (⠠) but this is used much more sparingly than the letter sign in English braille. It is rarely used after capital letters in abbreviations (as can be seen from the examples above). It is used:

- when the lowercase letters a-j follow a numeral: 1a ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠
- for single letters and abbreviations beginning with lowercase letters: Punkt a ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠, 3 mm ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠ (here the sign ⠠ may also "replace" the space), 4 kW ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠
- in such cases as: PCs ⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠⠠

A few *Kurzschrift* contractions

The *Kurzschrift* (grade II) has following additional single cell contractions that can be used in all positions in a word or - in the case of "es", "ein" and "er" - also as whole words:
